## STEREO AMPLIFIER MODEL 3001

This is our integrated audio amplifier with specially arranged pre-amplifier section for operation from both crystal and magnetic pick-up cartridges as well as stereophonic tape inputs. Separate Bass and Treble controls. Attractive design, finished in terracotta red with ivory panel, and suitable for panel mounting in furniture or free standing.

### Data for one channel, both identical

Power Output : 7.5 watts  
Output Impedance : 15 ohms  
Frequency Response : 40 c/s—20 Kc/s within  $\pm 1$  dB.  
Hum and Noise : -60 dB. (all input sockets)  
Overall Dimensions : 13" x 10 $\frac{1}{2}$ " x 4 $\frac{1}{4}$ "  
Weight : 18 $\frac{1}{2}$  lb.

*Two types of Pamphonic matching loudspeakers are available for use with Model 3001*

### *Sound Reproducing Equipment*

Having completed the installation of the Sound Reproducing Equipment on board the Union Castle Flag Ship "RMS Windsor Castle," and also on the latest Canadian Pacific liner "Empress of Canada," we feel sure that our products will prove of interest to visitors to the Exhibition.

Many other installations have, of course, been carried out since last April, using our "Beamed Sound" loudspeakers which may be better known by their previous title of "Line Source" loudspeakers.

We are exhibiting five entirely new items, two of which are amplifiers, one tuner and two of which are loudspeakers, and we feel confident that a visit to our Stand and Demonstration Room will prove of considerable interest. We shall also be exhibiting:—

**Stereophonic High Fidelity Amplifier Model 3001.** An integrated audio amplifier with a new pleasing finish in ivory and terracotta. The pre-amplifier section is arranged for operation from both magnetic and crystal stereo pick-up cartridge; inputs from stereophonic tape and radio are provided. Stereophonic output— $7\frac{1}{2}$  watts per channel; monaural output at 15 watts by switching.

**High Fidelity Monaural Amplifier 25 watt Model 2001.** Complete with separate pre-amplifier Model 2001A, a well-proved amplifier of extremely high performance.

**"Brick System" public address amplifier.** Once again we shall be showing our 50 watt model type 602W and the 100 watt model type 603W, both of which have been acclaimed by the trade since the last Audio Fair and used with great success in many installations. This unique "Brick System" has the advantage of providing very flexible microphone, radio and tape input combinations. The amplifier can be provided either in a transportable metal case or in chassis form for rack mounting.

**High Quality Public Address Amplifier type 661W.** This is a newcomer to our range and provides an integrated transportable amplifier having an output of 30 watts with inputs for two microphones, radio and microphones. We feel sure that this reasonably priced high quality amplifier will meet the requirements of many would-be users of public address systems.

**Portable Public Address Equipment Type 600PPA.** A complete portable unit with two loudspeakers. Operates from AC mains and car batteries.
